## Summary

As a frontend developer I markuped and integrated Javascript features on websites. Also I integrated those websites into several CMS with a stack of PHP and template engine Smarty. I used Git on my projects and CSS preprocessors (SASS). Also had some experience with Vue.js and React.js. Now I am interested in a job with JS framework React in company, where I could realize my potential and get new knowledge in most modern technologies .

## Skills

JS,React JS, Redux, htaccess, Apache, Nginx, Smarty, Gulp, Webpack, Git, HTML, CSS(SCSS),PHP
